

MODU — Demo Plan								
Single-sheet working script • designed for TV playback and easy reference-image insertion								
FORMAT	16:9	DURATION	Around 90 seconds	Mute-first / may start halfway through				
OVERALL STORY CONCEPT		MODU learns how you need help, guides you through the build, and turns what you complete into a space of your own.						
KEY VIEWER TAKEAWAYS		1. MODU personalises guidance. 2. MODU makes furniture assembly easier to understand. 3. Users stay in control of how much support they receive. 4. Completed furniture becomes part of a rewarding virtual-room experience. 5. Muted but add caption or text add music						Assembly, onboarding, avatar recommendation, profile
CONTENT FLOW		Onboarding → Avatar → Tutorial → Furniture Catalogue → Assembly → Reward → Inventory → Virtual Room → Friends' Rooms						
Scene / Section	Purpose	Visual / Action	On-screen Text	Reference Image	Reference	AI Means	Scree recording	Accomplishment
Onboarding	Introduce MODU and begin learning how the user needs help.	With a simple animation: MODU the octopus first jump in with the logo, then jump out the frame with a structure like the reference image, give a little mumbling then jump up on the screen, then goes back in the screen, then the screen zoom in to whole screen and start on-boarding showing (should we show the whole process of our on-boarding questionnaire?) No	MODU logo		https://www.youtube.com/watch?v=owYs_rCKxNA 00:02-00:04	✓	✓	✓
Avatar	Establish the user's identity within MODU.	(Keep zooming in) When it comes to avatar selection page, zoom in and add a little movement for the avatars, Modu the octopus will be on the top and then jump in.	TBD		https://www.youtube.com/watch?v=OFsNj-lpLS8 4:20-4:27	✓	✓	✓
Adaptive profile	Show our Adaptive Interface System	Start with a clean teal grid. Core UI components appear as soft floating elements: instruction bar, part cards, joystick, utility controls and guidance buttons. The elements gently assemble into one interface layout, pause, then detach and smoothly reconfigure into different layouts. Finish by settling into the final assembly interface and transition directly into the live furniture assembly demo. Motion should feel precise, restrained and premium, with soft easing, subtle depth and magnetic alignment.	Built from the same modular tools, but adapted to different support needs		https://www.youtube.com/watch?v=4SCjXcBeW1E 00:21-00:26		✓	✓
	Show how MODU introduces the system and available support.	tutorial / guidance setup flow	TBD				✓	✓
background	showing how MODU can adapt the overall atmosphere of the experience while keeping the core interaction structure consistent	The interface remains in place while the background smoothly transitions through several different visual environments.					✓	✓
Assembly	Demonstrate how MODU guides the furniture build.	assembly flow	N/A		https://www.youtube.com/watch?v=pNdZ2BC-Hvw 00:22		✓	✓
Furniture Catalogue	Show the range of furniture available in MODU while reinforcing the idea that every object can be explored through an assembly journey.	Start with a clean catalogue view showing 4–5 furniture models arranged across the screen. Each model appears in a different stage of construction, rather than as a static finished object.	N/A		https://www.youtube.com/watch?v=pNdZ2BC-Hvw 00:34 - 00:39		✓	✓
Task Completion & Rewards	Make the reward loop clearly visible and show how completing an assembly contributes to progression.	As the final part snaps into place, the interface pauses briefly and transitions into a clean completion state. Display Task Complete first, then reveal the rewards in sequence: the earned currency appears with a subtle count-up animation, followed by XP being added to the progress bar. Keep the background calm and let each reward land one at a time. Finish by showing the updated balance and XP progress before moving into Inventory / Virtual Room.	Your progress continues.			✓	✓	✓
Inventory	Show where completed or collected items are stored.	Scrolling over the inventory, unlock a new furniture, Get a furniture and place in the room.	TBD				✓	✓
Virtual Room	Turn completed furniture into a space of the user's own.	place and view furniture in virtual room, adjust the locations, zoom in to the room view	TBD		https://www.instagram.com/campfire.studio0/reel/Dbggc-AtOVS/		✓	✓
End	End of the video	Combining all frames together	Build with us		https://www.youtube.com/watch?v=PzomGOEZFqo 00:17		✓
